

Skills

- **Programming & Frameworks:** - .NET Core, C#, Angular, React, JavaScript, TypeScript.
- **Frontend Development:** - HTML, CSS, SCSS, Bootstrap, Tailwind.
- **Backend & APIs:** - REST APIs, GRPC, Clean Architecture, Design Pattern, LINQ, DLL Libraries.
- **Database & Storage:** - SQL (MySQL, PostgreSQL, SQL Server), Dapper, Redis (Caching & real-time data).
- **Real-Time Communication:** - SignalR, WebSocket.
- **Tools & Platforms:** - VS-Code, Visual Studio, GitHub copilot Git, CI/CD (GitHub Actions, Azure DevOps), Microsoft Services, ArcGIS.
- **Testing & Quality:** - Unit Testing, Automated Logged & Monitoring.

Work Experience

Software Developer – Appmatric - India

Mar. 2025

Project: - FLEETX2

Tech Stack: SignalR Integration, Redis, Clean Architecture, LINQ, DLL, JWT, ArcGIS, CI/CD

[Link](#)

- Implemented **real-time chat & notifications** with SignalR and Redis, boosting performance by **30%** and supporting **500+ users**.
- Enhanced **real-time vehicle tracking** using **GPS + ArcGIS maps** with pin/cluster selection and **Split.js** resizing, reducing manual operations by **40%**.
- Built secure backend using **Clean Architecture, LINQ, JWT**, and reusable DLLs, reducing duplication by **25%**.
- Developed unified **Add/Edit API** with smart ID handling, reducing redundancy by **35%**.
- Improved stability via **file-based logging** (error resolution time ↓ **20%**) and ensured **90%+ test coverage**.
- Implemented CI/CD pipelines using GitHub Actions and Azure DevOps, automating build, testing, and deployment processes, reducing manual release effort by 60%.

Project: - Customer Inventory System

Tech Stack: Amcharts, Google Map, JWT, Base64, CI/CD

[Link](#)

- Developed **end-to-end CRUD operations (Add, Edit, Delete)** with advanced **searching and sorting**, improving data management efficiency by **40%**.
- Implemented **interactive dashboards** with **AmCharts**, enabling real-time data visualization and enhancing inventory decision-making by **35%**.
- Integrated **Google Maps** for **location-based inventory tracking**, reducing manual lookup efforts by **40%**.
- Built a **custom report generator** for dynamic PDF/Excel reports, cutting reporting time by **50%**.
- Optimized file handling using **Base64 encoding**, reducing data transfer issues and improving performance by **25%**.
- Implemented CI/CD pipelines using GitHub Actions and Azure DevOps, automating build, testing, and deployment processes, reducing manual release effort by 60%.

Associate Software Developer – CDAC – India

Feb. 2024 – Feb. 2025

Project: - SWASTHYAINGIT

Tech Stack: SignalR, GRPC, Redis, Microsoft Services (Azure/Identity), Unit Testing, Design Patterns, Dapper

[Link](#)

- Facilitated the implementation of real-time chat and notification features.
- Improved the efficiency of conversations by 20%.
- Real-Time Data Exchange.
- Practitioner and Provider creating and after verification mapping the Practitioner and Provider.
- Developed automated file-based logging for efficient error tracking, system monitoring and authentication information when Enhanced system efficiency and response times.
- Implemented Redis for caching and real-time data storage, improving application performance and scalability.
- Ensured code quality and functionality using automated unit tests with high coverage.

Education

BACHELOR OF TECHNOLOGY – Amritsar Group of College

Jun. 2020 – Jun. 2024

Major: Computer Science & Engineering.
